

Welcome Connecticut Electric Customers!

Community Energy is proud to participate in the **CTCleanEnergyOptionsSM** Program. This voluntary program allows Connecticut Light and Power and United Illuminating customers to support renewable forms of electricity, such as Wind and Low-Impact Hydro energy, while still receiving your electric supply from your utility.

PRODUCT AND PRICING:

- **50% New Wind / 50% Low-Impact Hydro - For 100% of usage**
Adds 1.10 cents/kWh for 100% usage

For a typical Connecticut home that uses 600 kilowatt-hours per month, participating in **CTCleanEnergyOptionsSM** with Community Energy would add as little as \$6 monthly to your electric bill. No charge to cancel at any time. Please Note: All costs are IN ADDITION to your current electric bill.

Sign up today, it's easy!
