

## PSEG Long Island Green Choice Program Product Content Disclosure Label

Community Energy is a licensed renewable energy supplier participating in the PSEG Long Island Green Choice Program. Green Choice service supports the development of clean, renewable energy sources right here in the region. Customers can purchase Renewable Energy Certificates (RECs) through the program. This REC-only additional product represents the environmental attributes of renewable energy generation sources and helps sustain and reinvest in the development of new renewable energy projects.

When you enroll, you stay with PSEG Long Island as your electricity provider and are ensured the same reliable service as always. As more customers sign up, more wind and hydro energy will be delivered to the power grid. This means cleaner air and water, greater energy independence, and a more secure energy future.

<b>Renewable Energy Resources</b>			
<b>Product</b>	<b>Price</b>	<b>Wind Source</b>	<b>Hydro Source</b>
Option 1:	Adds 2.5 cents/kWh on all usage	100% New York Wind	N/A
Option 2:	Adds 1.3 cents/kWh on all usage	60% New York Wind	40% New York Hydro

New renewables come from facilities that first began commercial operation on or after January 1, 1998. Eligible hydroelectric are defined as facilities whose output is equal or less than 30 megawatts.

For comparison, the average mix of resources supplying New York includes: Coal 5%, Natural Gas 35%, Large Hydroelectric 23%, Nuclear 32%, Oil <1%, and <5% Other.
