

# Environmental Disclosure Label

Electric power suppliers are required by the Department of Public Utilities (DPU) to provide customers with a disclosure label. The label enables consumers to look at the energy sources, air emissions and information about the supplier's company in order to make a more informed choice of a power supplier. Consumers can compare energy labels to make the best choice based on their energy needs.

## Electricity Facts Community Energy, Inc. GreenUp - Standard Offer Service

### Generation Price

Average unit price per kWh at different levels of use. Prices do not include regulated charges for customer service and delivery.

Average use per month (kWh)						
250	500	1000	2000	10,000	20,000	40,000
9.936 cents per kWh for Residential Customers						
9.048 cents per kWh for Small General Service Customers						

The prices shown are in effect September 1, 2017 for customers on the fixed pricing option. A monthly variable rate pricing plan is also available. Please contact National Grid for more information. Price is a combination of National Grid Generation Price plus Community Energy GreenUp price. Please contact National Grid for more information about the Generation Price and Community Energy for more information about the GreenUp price.

Community Energy 100% is an extra 2.4 cents per kWh for all customer types.  
Community Energy 50% is an extra 1.2 cents per kWh for all customer types.

### Contract

The prices and terms for your participation in the GreenUp program are described in the Contract Terms and Conditions.

### Power Sources

Demand for this electricity product in the period 01/01/2017 - 03/31/2017 was assigned generation from the following sources:

Power Source	Residual Mix	Community Energy 100%	Community Energy 50%
Coal	7.69%	0%	3.84%
Diesel	1.00%	0%	0.50%
Jet	0.01%	0%	0.00%
Natural Gas	50.50%	0%	25.25%
Oil	7.48%	0%	3.74%
Wind	-	30%	15.00%
Small Hydro	-	70%	35.00%
System Mix	33.33%	0%	16.66%

### AIR EMISSIONS

Air emissions from the electric power resources used to serve Community Energy's GreenUp customers are compared to the New England regional average air emissions for all power resources in the period 01/01/2017 - 03/31/2017.

Pollutant Type	Lbs per MWh	Community Energy 100%	Community Energy 50%
Carbon Dioxide	874.8354	0%	47.20%
Carbon Monoxide	0.9350285	0%	54.44%
Mercury	0.000000149	0%	74.50%
Nitrogen Oxides	0.60101	0%	50.93%
Particulates	2.393298	0%	74.75%
Fine Particulates	0.7866992	0%	72.35%
Sulfur Dioxides	1.207698	0%	110.07%
Organic Compounds	0.0811	0%	66.52%

### Labor Information

0% of the electricity from Known Resources came from power sources with union contracts with their employees.

0% of the electricity from Known Resources came from power sources that used replacement labor during labor disputes between 01/01/17 and 03/31/17.

### NOTES

- Electricity customers in New England are served by an integrated power grid, not particular generating units. The above information is based on the most recently available information provided by National Grid's suppliers via the NEPOOL Generation Information System. National Grid procures its electricity supply for Basic Service, on behalf of its customers, from system power contracts, not from specific generating units.
- For additional information: call National Grid at 1-800-322-3223, Community Energy at 1-866-946-3123, or the the Department of Public Utilities Consumer Division at 1-877-886-5066 ([www.mass.gov/dpu](http://www.mass.gov/dpu)), or Massachusetts Division of Energy Resources, [www.mass.gov/doer](http://www.mass.gov/doer).
